

HEATEX

Heatex is a computerised system for the identification of wires, cables, tubes and equipment. Each type of marker can be printed by thermal transfer or dot matrix printer. Using the excellent CAB range of thermal transfer printers and carefully selected TEXTIT ribbons, Heatex offers a superb combination of clarity and durability.

For use with computers operating all Windows versions 95 and above, there is a choice of easy to use label software packages. These allow marker files to be easily imported from most popular spreadsheets and databases, making the Heatex system the best choice for fast, convenient marker production.

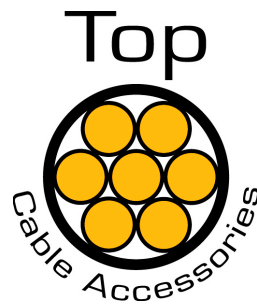

HEATEX HEATSHRINKABLE WIREMARKERS

Made from flame retarded cross linked polyolefin to MIL-23053/5, MIL-STD-202 method 215, MIL-M-81531 clause 4.6.2, UL224 and VG95343/5 type A.
